Snow Bulletin www.regione.piemonte.it

Skiing in Piedmont: an sms or an e-mail tells you where

The Regione Piemonte's new **'Infoneve'** service is a snow information service organized by the regional administration and offers all the necessary information to plan a skiing week, a weekend or a day on the slopes. All you have to do is register in the "Skiing in Piedmont" section of the site www.regione.piemonte.it/turismo and you will receive text messages and e-mails with information concerning **resorts, connections, accommodation, characteristics of the pistes and of the facilities for alpine skiing, cross-country skiing, snowboard and luge, prices, "après-ski" opportunities and free time activities, weather and snow reports and special offers.**

In order to provide an even more detailed and prompt service, the snow bulletin of 'Regione Piemonte' is updated **three times a week**. Thanks to the use of network devices and new information technologies, an automatic system has been set up through which all the **Local Tourism Boards** of Piedmont and all the **skiing locations** are able to update the data directly via Internet.

Piedmont: The White Galaxy

53 skiing locations, 1,300 kilometres of slopes, over 300 structures such as cable cars, two-seater cable cars, chair lifts and ski lifts, able to transport over 400,000 people every hour in complete safety. 1,000 different entirely unspoilt natural environments, hundreds of valleys and villages, each of them with its own history, art, culture and local cuisine. These are the stunning figures that make Piedmont a white galaxy. To help you find your way through this myriad of possibilities, a new edition of the catalogue “Skiing in Piedmont” is now available. This guide is reliable, handy, easy to use, precise and accurate; bring it with you at all times to organize your day’s outing, a skiing weekend or a week on the slopes down to the very last detail, moment by moment. “Skiing in Piedmont” includes information on skiing as well as after skiing activities, different sports, assistance and emergency services and food and accommodation; it is a most useful guide for those who wish to experience everything the mountains have to offer, because it presents choices and options to satisfy each and every need and preference. Professionals and beginners, single people and families, lovers of peace and quiet as well as nightlife enthusiasts, everyone can find the answers they are looking for in “Skiing in Piedmont”. Those who wish to know more and find the most updated information can visit www.regione.piemonte.it/turismo, the portal for tourism in Piedmont that displays prices of hotel rooms and snow bulletins in real time as well as webcam views of the pistes. Enjoy the mountains with “Skiing in Piedmont”!

Turin, a centre for sports on ice, with additional facilities at the foot of the mountains in Pinerolo, and an alpine area for snow sports based in Sestriere. They are connected by a motorway, two state roads and two railway lines – to ensure that the distances comply with Olympic standards and with the requirements of the IOC. The Turin 2006

Olympic System has a compact and functional form, appreciated by the IOC and by international Sports Federations. In Turin, the “Olympic District”, centred in the Lingotto area, will be the location of the Olympic Village, of sporting facilities for hockey, speed skating, figure skating and short-track racing, as well as of the Olympic

Family's hotel. The curling tournament will be held in Pinerolo. Higher up in the mountains, alpine skiing will take place partly in Sestriere, partly in Cesana-San Sicario; snowboarding competitions will be hosted in Bardonecchia; cross-country skiing, ski jumping and Nordic combined events will be held in Pragelato; bobsleigh, luge and skele-

ton near Cesana, in the Pariol-Grenier area and freestyle in Sauze d'Oulx. Athletes will be accommodated in three different Olympic Villages (Turin, Sestriere, Bardonecchia), while journalists and media operators will lodge in six Media Villages located in Turin and in mountain hotel structures.

An area dedicated to snow sports in Sestriere and Pragelato and a more urban setting for sports on ice in Turin with additional facilities at the foot of the mountains, in Pinerolo, for curling, a discipline included for the first time in

the Paralympic Games. Multiple connections by means of motorways, state roads, and railways shorten the distances and provide services of the highest quality. The Paralympic System of Turin 2006 is functional: athletes will be

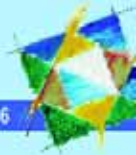

accommodated in the Sestriere Village while the hockey team may also be accommodated in Turin. The Paralympic family will be in Sestriere as well as the press centre. Disciplines: alpine skiing will take place entirely in Sestriere,

Pragelato will host cross-country skiing and biathlon competitions, while ice hockey matches will take place in Turin on the "Torino Esposizioni" premises and the curling tournament will be held in Pinerolo.

The Susa and Chisone Valleys

Montagnedoc is a district that stretches over the **Susa Valley** and the **Pinerolo** area with 1,500 km² of slopes surrounded by natural landscapes that are unique in the world. Those who have a passion for snow sports can choose from pistes of a variety of level, slopes with lighting installations for night-time skiing and powder snow tracks for off-piste excursions. Sports lovers can also practise: cross-country skiing, telemark skiing, snowboarding, ice-climbing, free-riding, ski mountaineering, trekking on horses, dog-sledding with Siberian Husky dogs, paraskiing and heli-skiing. The Montagnedoc area offers the best in winter sports as well as many relaxing and enjoyable leisure activities. Visitors have the opportunity to discover the local history, traditions, arts and crafts of old, costumes, enological and gastronomic specialties and truly exceptional typical products.

Sestriere, located at an altitude of 2.035 m on a mountain range of the same name, overlooks the **Chisone** and **Susa Valleys** and was the first truly modern Italian skiing resort. It was set up in 1937 by the Agnelli family, and is now an outstanding spot for snow sports enthusiasts. Part of the "Milky Way" skiing district and well-renowned worldwide, the area offers 146 different pistes provided with 92 lift facilities, 400 km of slopes, of which 80 km are covered in artificial snow using 950 cannons. It is also possible to reach 5 other skiing resorts or to ski at night thanks to floodlight installations. From the easier slopes to the more challenging off-piste tracks, from ski mountaineering to cross-country skiing, everyone

will find the ideal grounds to put their skills to the test. A wide selection of runs of high safety standards will host some of the competitions of the Turin 2006 Winter Olympic Games. An ice-skating rink is also available. Thanks to such a choice of facilities, Sestriere is the truly unrivalled queen of the Piedmontese Mountains.

Worldwide famous slopes in the Sestriere area:

Kandahar Banchetta Giovanni Nasi (downhill skiing)

Sises - Cit Roc (giant slalom)

Giovanni Alberto Agnelli (special slalom at night)

Sauze d'Oulx, surrounded by the towering Triplex, Bourget and Generis peaks, is a perfect mix of fun, natural beauty and charming remains from the past. It offers several sporting facilities equipped with the most advanced technologies. The true cradle of Italian skiing, this "balcony of the Alps" is the ideal starting point for Alpine skiing excursions. Sauze d'Oulx is located right in the centre of the "Milky Way", one of the largest skiing districts in the world with 91 lift

facilities and 400 km of pistes, of which 75 km are provided with artificial snow-making equipment. The local pistes are wide and fast and skiers can experience off-piste outings through larch and fir tree forests. Ski mountaineering expeditions, excursions with snowshoes, ice waterfall climbing and off-piste skiing courses make for a highly varied programme in this outstanding resort of the High Susa Valley.

Claviere, located at an altitude of 1,760 m, is a small village with a great past. Already well-known during the times of Hannibal and Julius Caesar, mentioned by the poet Petrarch in 1353, today Claviere offers its visitors several sports and accommodation facilities. It borders with the skiing resort of Monginevro and is connected by means of public transport to the railway station in Oulx. It belongs to the "Milky Way" skiing district and does not cater solely for alpine

skiing. Ice-skating during the day and at night and two Nordic skiing rings, one of 16 km (Claviere to Monginevro and back) and one of 200 km between Claviere and Névache, enhance the quality of the services offered in this location, very much appreciated by all snow sport enthusiasts. In Claviere visitors also have the chance to sample several food specialties in the local restaurants, in pubs and bars.

Bardonecchia, 1,312 metres in altitude, stands in a vast basin at the foot of an imposing amphitheatre. Its borders with France and boasts skiing facilities of the highest level with 22 lift installations, capable of transporting 23,850 people every hour, 110 km of downhill pistes, of which 20 km are provided with artificial and fully automated snowmakers, snowboarding and carving tracks as well as several cross-country skiing rings. You can feel the passion for snow sports of every kind in the air together with an atmosphere rich in history, culture, art and architecture. Magnificent landscapes unwind among unspoilt forests and there are both welcoming refuges and numerous refresh-

ment areas along the pistes. Abundant hotels and restaurants offer the chance to sample the typical alpine cuisine and every year a packed programme of theatre shows with national and international companies is organized at the "Palazzo delle Feste". These are the features that make Bardonecchia the ideal place to appreciate the charm of the alpine environments and, at the same time, enjoy a fulfilling social life. Bardonecchia will be the location of snowboarding competitions during the upcoming Winter Olympic Games of 2006. The most renowned slopes among skiers are: **Colomion, Melezet, Jafferau.**

Pragelato is the main winter tourist resort in the **Chisone Valley**. Due to the technical features and the beauty of its slopes, it is one of the most appreciated skiing areas of the entire Alpine chain. Pragelato offers 6 lift facilities, interconnected chair lifts and ski lifts, 50 km of well tended pistes stretching between altitudes of 1,535 m and 2,700 m and exceptionally beautiful panoramic views that make for exciting descents for beginners and experienced skiers alike. The slopes, often covered in fresh snow even in spring, are perfect for lovers of off-piste excursions and cross-country skiers can choose from among 7 different tracks unwinding through landscapes of stirring beauty, partly within the Val Troncea Nature Park. A skating rink equipped with lighting installations and a riding club for horse trekking open all year round are among the plentiful facilities available in this versatile skiing resort. Also those who wish to enrich

their culture after a day on the slopes will have the opportunity to experience a wide variety of cultural activities. Pragelato will be the location of cross-country skiing, biathlon and ski jumping competitions during the upcoming Winter Olympic Games.

Prali is a skiing resort in the **Germanasca Valley** and today it still preserves many features typical of an Alpine village. Surrounded by magnificent natural scenery at an altitude of 1,450 m, Prali offers 7 lift facilities, 25 km of slopes and a cross-country skiing ring of 15 km in length. Off-piste skiing tracks, dog-sledging, excursions on foot or with snowshoes, figure skating and ice-climbing facilities are among the other available services. After a day on the slopes, visitors can enjoy several recreational activities. There are museums on the Waldensian traditions: the one in Prali concerns their history and culture, the one in Rodoretto is based on work and life in the mountains and the museum in Balsiglia is about the glorious return of the Waldenses from exile in 1689. Visitors can also board a little train that travels through the mountains and takes them to "Scopriminiera", a modern

tourist and museum centre where you can learn more about the traditional mining activities of the local valleys. Moreover, enological-gastronomic tours to discover Waldensian dishes and products typical of mountain agriculture are available for lovers of good food.

WEATHER FORECAST ASSISTANCE

Servizio Meteomont

The **Pian del Frai** resort is particularly suitable for families and training programmes, school trips and excursions organised by skiing clubs, thanks to its main feature: all the slopes converge into the same basin. The area offers tracks that are particularly appreciated by snowboarding and alpine skiing enthusiasts, a lighting installation for night-time skiing and a new artificial snow-making facility that ensures the pistes are open from November to April.

Pian Neiretto, a small skiing district located above **Coazze**, focuses more on the sporting activities rather than on the tourist facilities. It does not offer a wide range of services but is the ideal spot for learners and for those who wish to ski in utter tranquility.

The Cuneo Valleys

Imagine a stretch of state-of-the-art pistes and lift facilities, unspoilt landscapes, locations where snow sports come together with cultural and enological-gastronomic itineraries, slopes where you can truly experience the emotions of the descent, the excitement of snowboarding or the steady pace of cross-country excursions. Imagine a myriad of restaurants where you can sample truffles, mushrooms, cheeses, chestnuts, snails and, above all, wines. All this becomes reality if you choose to visit the skiing resorts in the province of Cuneo. The Riserva Bianca of Limone Piemonte, the "Mondolè Ski" districts with the skiing facilities of Artesina and Prato Nevoso, the Valleys in the Monregale area including San Giacomo di Roburent, Lurisia, Frabosa Soprana and Garesio 2000, the Varaita Valley with Pontechianale and Sampeyre, the Po Valley including Crissolo, Pian Muné and Rucas, the Gesso Valley with Entracque and the Stura Valley including Festiona and other resorts for cross-country skiing are the ideal locations to experience unique and unforgettable emotions, to enjoy the warm welcome, the efficiency and the practicality that are typical of the largest province of Piedmont, the so-called "Provincia Granda".

Prato Nevoso, located 1500 m above sea level in the Borough of Frabosa Sottana (CN), overlooks a wide set of slopes and offers a skiing area with over 100 Km of pistes, partially made with artificial snow, which reach an altitude of 2000 m and are provided with 24 lift facilities. Skiing schools, a snow park, pistes with lighting installations for nighttime skiing, a cross-country skiing ring, a skating rink, ice carting, snowmobiles and several ski mountaineering facilities make for a true Ski-total resort, capable of catering for the needs of each and every sportsperson. Thanks to its geographic location, between Monte Mondolè and Monte Moro, and to the supreme exposure of its slopes, the presence of powder snow is guaranteed throughout the season, a feature very much appreciated mostly by lovers of off-piste and of ski mountaineering. Several refuges scat-

tered along the tracks that allow for excursions of more than one day, the "Pratolandia" children's playground, cafes, typical restaurants, nightclubs, cinemas and hotels of all categories make Prato Nevoso one of the most renowned skiing resorts in the Marittimo Alps.

CROSS-COUNTRY SKIING

(3 km of slopes)

Located at 1,300 m above sea level in the Borough of Frabosa Sottana (Cuneo), **Artesina** is part of the **Mondolè Ski** district that offers 90 km of pistes serviced by 25 lift facilities. It is included among the Ski-total locations as since its pistes are capable of satisfying the needs and preferences of all types of skier. All sportspeople, from beginners to experts, will find the run that is most suited to their skills because there are many pistes at Artesina of varying degrees of difficulty, from the easiest, such as the Costabella piste, ideal for beginners, or those at Colletto, Turra, Pogliola, to the most challenging, such as the Rocche Giardina, Mirafiori and Mondolè pistes, and the piste connecting Colle Bauzano to Cima Durand. The bravest can put themselves to the test on the Black Piste that runs down for 450 m from the Turra plane to Artesina. A 4-km-long ring is available to cross-country skiing enthusiasts. Those who prefer ski moun-

taineering can experience unforgettable emotions here, from the ascent to Monte Mondolè (2,382 m) to high altitude off-piste excursions in the heart of the Maritime Alps.

Limone Piemonte, Limonetto and Quota 1400 are the three centres of the **Riserva Bianca** skiing district. Located at the foot of the Colle di Tenda mountain range in the Maritime Alps, the area offers 80 km of slopes for alpine skiing with natural snow from December to April and 20 km of pistes with artificial snow-making installations. There are 25 lift facilities and visitors have the opportunity to practise all kinds of winter sports or relax in one of the many refreshment areas along the pistes. The slopes of Riserva Bianca have different lengths and various levels of difficulty, so that all skiers, from beginners to the most skilled, have the chance to experience unique emotions. Nordic skiing enthusiasts can choose between two tracks in the Panice Sottana area, one of 3 km in length and another more technical one of 5 km, or ski along a ring in Vernante, which unwinds through the

Vermentagna Valley. Limone is also a paradise for ski mountaineering with excursions of various lengths and levels of difficulty. Tracks unfold along slopes and peaks that are well known among lovers of this discipline, such as Cima Fascia and Vallone San Giovanni with the Cima Pepino peak, where skiers can enjoy a stunning panoramic view of the Piedmontese plains, the Ligurian Sea and Corsica. Those who practise ski mountaineering will also appreciate Rocca dell'Abisso, Monte Chiamossero and Monte Creusa, from where they can begin their descent down the Val Grande di Vernante. The most famous slopes in the Riserva Bianca area are: the **Olympic Piste** on Monte Alpetta, the **Cabanaira**, the Macchetto and the **Giorgio Armand**.

Since the times of the Roman Empire, **Limone Piemonte** has owed its fame to its geographical position. Located along the main road that links Piedmont, the plain and Liguria, Limone was already a well-established tourist resort at the beginning of the 1900s. Many remnants from the past and characteristic traits of a classic alpine village are still visible in the town centre, such as remains of the ancient Roman Road leading to Limonetto and to the Col di Tenda pass. Surrounded by parks and nature reserves with fauna and flora that are varied and plentiful thanks to a mild

alpine climate, proud of its culture and of its native tongue of Provençal origins, Limone offers various recreational activities to those who sojourn there. Besides the Piedmontese cuisine served in various typical restaurants, visitors can taste dishes that are simple but prepared with great care, based on local natural resources, such as "polenta" made with buckwheat flour, game, mushrooms and fruits of the forest. Furthermore, Limone boasts a long tradition and well-established expertise in the organization of international sports competitions.

The skiing district around **Sangiaco di Roburent** is perfectly integrated with the life of the village, provided with all the necessary facilities for a pleasant stay. Over 30 km of slopes, of which 5 km are equipped with artificial snow-making facilities, unwind along the two mountains that rise just behind the urban area, Bric Colmé (1300 m) and Monte Alpet (1600 m). The pistes are provided with 1 two-seater chair lift and 8 ski lifts and skiers have a variety of slopes to choose from, ranging from the very challenging ones to those where beginners can enjoy themselves and learn how to ski in complete safety.

Lurisia, boasts a mountain landscape that is ideal for spending unforgettable days on the slopes of Monte Pigna. This well-renowned skiing and spa resort is located only 12 Km away from the Mondovì motorway exit and just 20 Km outside Cuneo. It can easily be reached regardless of the weather conditions. A chair lift, a cable car and a new chair lift in the process of completion lead to 6 skilifts located at a higher altitude where experienced skiers as well as beginners can enjoy an unspoiled paradise free of cars, stress and nerve-racking overcrowding. State-of-the-art snow-making equipment together with the scrupulous work of expert snowmobile drivers ensures that besides their natural beauty the pistes are also extremely safe, enjoyable and in working order in all weather conditions. In addition to the already existing 35 Km of slopes, there

is now the new 4-Km-long “Serralunga” piste, with breathtaking panoramas and views of the Valle Pesio Nature Park. After a day on the slopes or if winter sports are not your greatest passion, in Lurisia you can give your body a unique treat in the hands of the highly qualified personnel of the local Spa.

Chiusa Pesio, situated in the Natural Park of Alta Valle Pesio and Tanaro and dominated by the calcareous massif of Marguareis, offers to the people keen on Nordic skiing, more than one courses of gradual difficulty and length.

The local Marguareis Sport Centre, in fact, has got a 5 Km FIS homologated slope, a 10 Km tourist one that go through Certosa and a 30 Km slope that from Certosa arrives to Pian del Gorre.

The Centre is supplied with various facilities such as: bar, lunch bar, typical restaurant, and it offers the possibility to rent skis and ice skates. Moreover, alpine skiing, ice skating, excursions with snowshoes, and the opening soon centre dedicated to biathlon, complete the offer of this resort.

Finally, the Pian della Gorre and del Garelli refuges are a referring point for those who are keen on touring and mountain climbing.

Frabosa Soprana, is one of the oldest skiing resorts of the Maritime Alps and it has been a hotspot for winter sports culture for over 60 years. Today it boasts over 50 Km of downhill pistes complying with FIS (Italian Federation of Winter Sports) standards for high-level competitions, snowboarding runs and cross-country skiing tracks as well as a connection to the 90 Km of pistes of the Mondolè Ski area. In Frabosa Soprana you are spoilt for choice: its service network can satisfy each and every visitors' need. Among the main attractions are snow carting, snow tubing, a lifting facility especially designed for children and a supervised nursery. In this picturesque village you will enjoy relaxing walks and unforgettable atmospheres or discover the wide range of inns, taverns and shops where you can sample traditional dishes or buy local products.

Dog sledge at the skiing school

The skiing location of Garessio 2000, on the Colle Casotto mountain range, overlooks two valleys and from the top of Monte Berlino skiers can take in a stunning view of the Western Ligurian Sea. There are 5 lift facilities servicing around 30 km of downhill pistes. Besides ski mountaineering, lovers of newer sports such as snowboarding, or of traditional ones, such as carving, can attend courses given by local instructors. Here is how **Giorgetto Giugiaro**, ambassador of Italian design in the world, describes his homeland: "An emerald green valley that conquers you with its waters and discreteness. It is appreciated only by connoisseurs, who love simple things like the local cuisine and the paths and the peaks from where you can see the sea even when you are skiing".

SAVONA (1600 m)

Località Pian Bersi

The Cantarana Ormea Cross-country Skiing Centre, in Alta Val Tanaro, is the southernmost cross-country skiing centre in the Alps. Placed close to Ormea, in a very suggestive environment, the Cantarana Ormea Cross-country Skiing Centre gives the chance to choose between slopes of various levels of difficulty. There are slopes suitable for beginners and expert skiers and also slopes more right for those who practice the cross-country skiing at a competitive level. The slopes, prepared with modern mechanic means, offer the possibility to use both the classical and the free technique. Moreover, since last year, a 2 km ring has been traced. Thanks to an artificial snow system, it can be used even without precipitations. The Centre is man-

aged by the Ormea Ski Club members, who are available for those who want to practice this sport. In addition there is a proper structure built to be the centre operative base, that offers the possibility to use a changing room and to rent the necessary equipment. The slope, normally, is open all weekends – from middle December – and all days during the Christmas holidays. But it is also possible, previous phone call, to request the opening during the week for groups or students. Moreover, at Briga Alta municipal district, at an altitude of 1.329 metres, in Upega resort, there are 2 cross-country skiing slopes. The main one has a total length of 5 Km and goes through an impressive conifers wood, while the second ring is close to the Negrone

stream and has a length of 1,5 Km. The slopes opening varies according to the snow conditions, thus is recommended a previous phone call to the numbers +39 0174 393829 and +39 0174 390145 for information about the slopes conditions. This resort offers also some other activities: climbs on ice cascade and excursions with snowshoes and cross-country skis.

Entracque, located 904 m above sea level, stands in the centre of a natural amphitheatre surrounded by peaks higher than 3000 metres, including the famous Argentera (3297 m) and **Gelas** with its glaciers. Near the village are 5 alpine skiing areas, serviced by 4 lift facilities at the “Viver SkiLifts”, all of which are suitable for beginners and families. There are also several after-skiing recreational facilities, while the Nordic skiing area of Gelas, with over 40 Km of regularly beaten tracks, is able to satisfy even the most demanding cross-country skiers. Among these, the so-called ‘Feit’ piste, complying with FIS (Italian Federation of Winter Sports) standards for international competitions, is provided with artificial snowmaking equipment and therefore always operational. Lovers of excursions will very much appreciate the “Sartaria” track that unwinds through a

gully of the same name. Thanks to the rough shapes of its rock formations, the valley of Entracque is also ideal for spring ski mountaineering.

Festiona, a small site in the Borough of **Demonte** in the **Stura Valley**, fully deserves to be regarded as the capital of cross-country skiing in Piedmont. The Festiona Cross-Country Centre is surrounded by a breathtaking landscape that can be appreciated by skiing along its 40 km of pistes. The tracks make up 7 different rings with various geomorphologic features and different levels of difficulty, perfectly suited to learning basic techniques and providing complete and effective training for both tourists and athletes preparing for professional competitions. The pistes unwind among age-old chestnut trees and allow professionals as well as lovers of cross-country to enjoy their sporting activities surrounded by a truly unspoiled natural setting. The instructors of the "Festiona Valle Stura" ski school, certified by the Region of Piedmont, help skiers to improve their skills, while the Cross-Country Centre employs specialised instructors for the disabled. In your free time do not miss a visit to Demonte, the main town of the

Stura Valley, rich in historical buildings, among which Medieval porticoes, the San Donato Parish Church and the Church of San Giovanni Decollato.

The **Aisone – Vinadio Cross-Country Centre**, with over 50 Km of slopes, draws the attention of thousands of Nordic skiers every year. Starting from the Cross-Country Centre, located in the plain of Aisone at the foot of the distinctive embankment that supports the village, you can reach Vinadio and without taking your skis off you can access the ramparts of Forte Albertino. Several tracks allow tourists to enjoy a wonderful view of the highest peaks of the valley and their various degrees of difficulty cater for beginners and experienced skiers alike. A most interesting itinerary for off-piste lovers unwinds through the Valletta gully and leads to Pinet, located within the Park of the Maritime Alps.

The slopes of **Bagni di Vinadio** start from the alpine village of Strepeis and unwind through a stirring and wild land, among forest of fir, larch and pine trees. Nearby are spa facilities built in the mid 17th Century, with hot sulphurous waters used for several health treatments. Thanks to these features Bagni di Vinadio has become a well-renowned tourist resort appreciated by those who enjoy Nordic skiing as well as ski mountaineering excursions through the numerous surrounding gullies. The sports centre, dedicated to local Olympic athlete Giulietto Gerardi, boasts 5 rings of different lengths, operational even when the snowfall is scarce. Skiers should not miss the track that leads from Bagni to San Bernolfo, a small village with unique architectural features such as houses with original straw roofs and walls made of interlocked tree trunks.

The “**Scricciolo**” Cross-Country Centre in Pietraporzio boasts tracks unwinding through forests of fir trees and high plains in a wild and charming natural environment. When she was a child, the Italian champion Stefania Belmondo learnt to ski on these mountains and she still trains here rather frequently during the winter. The pistes stretch around the village of Ponteb Bernardo, location of the Eco-museum of Stock-raising, and allow skiers to reach the hamlet of Sambuco and to pass the ancient bell tower of San Bartolomeo, rising against the steep sides of Mount Bersaio. The most interesting skiing ring of the area is located in Pian della Regina, a plain surrounded by a wonderful amphitheatre of imposing peaks. However, the true highlight of the area is ski mountaineering with several fascinating itineraries, among which those leading to Mount Vaccia, the Piz Gully and the Balour Plain.

The high **Valley of Stura di Demonte** is the location of an alpine skiing station, renowned for the excellent quality and abundance of its snow and for the typical alpine landscape that surrounds it. The pistes unwind along slopes covered in larch trees overlooking the river Stura and the surrounding alpine landscape is truly stirring. The total length of the pistes is over 30 Km and they are appropriate for each and every need and all levels of skill. Some tracks are suited to competitions of all kinds and the off-piste tracks stretching from the peak of Mount Enchastraye and leading to Argentera and Prinardo are extremely rewarding.

Pian Muné – Paesana. “A white terrace overlooking the plain” is the definition given to the panoramic skiing resort of Paesana due to its breathtaking view of the arch of the Piedmontese Alps, with the towering outline of Monviso, and the plain. The skiing facilities are 14 Km away from the village of Paesana and can be easily reached via a wide and secure road. A cross-country skiing ring of around 3 Km in length is available. Accommodation facilities, restaurants and services of all kinds are located in the village and offer several leisure activities to make your stay even more enjoyable.

Crissolo – Pian Regina. This is the skiing resort of Monviso; it is located at the foot of the “King of Stone”, in close proximity to the sources of the river Po, whose first stretch runs along the pistes. A handy chair lift departs from the centre of Crissolo and reaches the skiing facilities further up, from where it is possible to ski to Pian Regina, a GTA (Great Alpine Crossing) staging post. Here you will find a **cross-country skiing** ring, 3 Km in length, located 1,745 m above sea level, which can also be reached by car, another 4.5 Km past the village of Crissolo. Accommodation facilities, restaurants and an ice-skating rink are located in the village.

Rucas – Bagnolo Piemonte. Travelling past Montoso, 15 Km from Bagnolo Piemonte, visitors reach the skiing resort of Rucas, located in a wide valley with a breathtaking view of the Ostanetta and Frioland peaks. The latter pinnacle overlooks the plain of Turin, which is a mere 65 Km away. The area is easily accessible and has a wide selection of pistes; it is therefore an ideal location both for those who are new to the art of skiing and for more experienced skiers.

The **Varaita Valley** offers numerous downhill slopes of easy and medium difficulty that are suitable for all skiers but in particular children and beginners. The skiing facilities are located in **Sampeyre**, Bellino and, above all, in **Pontechianale**, where a chair lift carries visitors up to 2,670 m. Cross-country skiing tracks of all levels of difficulty unwinding for a total of 100 km are also available. Besides those of Bellino, Chianale, Casteldelfino and Sampeyre, the most extensive runs are in Valmala. On the peaks around Sampeyre or in the gullies of Chianale and Bellino, lovers of ski mountaineering can choose several different itineraries, while climbers will enjoy some of the best ice waterfalls in the Alpine chain.

Valsesia, overlooked by the towering Monte Rosa Massif, is a valley located between the steep mountains of Valle d'Aosta to the west and a wide glacial valley to the east, whose lower part is filled with the waters of Lake Orta. Along the northern ridge of Monte Rosa that separates Valsesia from Valle Anzasca and Valstrona you will find the valleys of Sermenza and Mastallone, whose higher slopes are home to striking tourist resorts such as Rima S. Giuseppe, Carcoforo, Fobello, Cervatto and Rimella. The valleys located along the southwestern ridge, bordering with the Gressoney Valley and the Biella area, are from north to south: Otro, Vogna, Artogna and Gronda. Varallo Sesia is the main urban centre in the valley of the same name and it is famous for its religious constructions, including the very famous Sacro Monte (Holy Mount) Sanctuary towering over the town. The neighbouring territories boast prominent industrial and commercial towns and villages, renowned all over the world for textile industries that produce top-quality cashmere fabrics. Valsesia is a much appreciated tourist area due to the unrivalled beauty of its landscapes and to the endless variety of attractions and activities available to sports lovers and visitors in general. Valsesia has preserved all its most authentic features and it is a place where nature comes together with arts and traditions deriving from the rich and enchanting ancient past.

Alagna (1192 m) is the most prominent skiing resort in Valsesia. From the Punta Indren peak, you can enjoy a view over Monviso, Gran Paradiso, Mont Blanc and the pinnacles of Monte Rosa with the magnificent Lyskamm. The new lift facilities along the Valsesia side of Monte Rosa are part of a wide skiing area that includes the interconnected slopes of the Sesia Valleys (Piedmont) and of the Ayas and Gressoney Valleys (Valle d'Aosta). The project, operational from December 2003, enables sports lovers to choose from among dozens of pistes, connected by means of several lift facilities and providing for the needs of highly skilled skiers, lovers of off-piste and telemark skiing as well as families. An eight-seater box lift, carrying up to 1400 passengers per hour, connects Alagna to Pianalunga (2025 m). From here it is possible to reach Passo dei Salati, a pass that leads to the lift facilities of Gressoney by means of a "Funifor" cable car, with a

capacity of 800 people an hour and capable of covering a difference in altitude of 900 m in just 6 minutes. The starting point stands at an altitude of 2100 m, the arrival station at 3000 m and an intermediate stop at 2650 m will soon be ready. New facilities will bring skiers from Passo dei Salati to the glaciers of Monte Rosa. Meanwhile, the Punta Indren panoramic spot can be reached by using the last stretch of the already operational cable car. When getting off the box lift of Pianalunga, visitors ascend to Bocchetta delle Pisse (2396 m) by boarding a two-seater chair lift. From here, they travel onboard a cable car to Punta Indren, at an altitude of 3260 m. The resort is equipped with ski lifts and another cable car and offers a selection of over 22 Km of pistes of all difficulty levels spread throughout the Valsesia area and ranging between altitudes of 1200 m and 3260 m.

Alagna Valsesia is a true snow paradise. Beginners have the chance to learn skiing techniques and new disciplines in complete safety on the blue pistes of the Wold area, covered with artificial snow and only 500 m away from the centre of the village. Cross-country skiing enthusiasts will appreciate the ring of the “Marmotta Rosa” Cross-country Centre in Riva Valdobbia, a 10-Km-long track ideal for each and every need. Those who like off-piste on powder snow can choose from among an endless selection of tracks, partially unexplored. Steep gullies or wide stretches covered in unspoilt, soft and often powdery snow guarantee maximum satisfaction to the most demanding skiers. Off-piste tracks here are among the longest and most exciting in the whole Alpine chain with differences in altitude of over 2500 Km and gradi-

ents up to 45 degrees. There are runs dedicated to those who practise steep skiing and professionals are given the chance to improve their skills. The Monte Rosa mountain range is the ideal area for ski mountaineering, which brings sportspeople in contact with the true aspects of the mountains. Ascents with sealskins for skiers or with snowshoes for snowboarders are challenging but offer magnificent views. An ideal location for ski and snowboard mountaineering is the Alta Valsesia Natural Park where the Gnifetti Peak, on the Monte Rosa Massif, reaches 4,559 m making this the highest park in Europe.

Scopello (659 m) is a welcoming skiing resort crossed by the River Sesia and located in the centre of **Valgrande**. The **Scopello Alpe di Mera** (1,550 m) skiing district is one of the main attractions of the area. It stands on a wonderful plateau overlooking the Monte Rosa Massif and it can be reached by boarding a chair lift or by travelling on the road that leads to the open spaces of Trogo, right beside the slopes. Visitors do not need to take their skis off to access hotels, restaurants, shops and cafés. **Alpe di Mera**, with its gentle ridges, provides skiers with over 35 km of pistes, of various difficulty levels, serviced with 6 lift facilities. There are wide panoramic tracks, with a difference in altitude ranging from 1,700 m around the highest peaks to 650 m in the valley bottoms. Those who like sunbathing can stop at terraces located right along the slopes and enjoying excellent exposure as well as a mild climate.

Nordic skiing enthusiasts in Scopello will enjoy 15 km of rings with various degrees of difficulty surrounded by wonderful scenery and can try out the only cross-country track in Piedmont partially covered in artificial snow. A "Minibelt", a modern ski carpet lift for children, and an ice-skating rink are among the other facilities available in this delightful resort.

Rimasco, 905 metres above sea level, offers picturesque and romantic views, including the charming Castello peak (1996 m) towering in the west over a wide and thick fir tree forest. An artificial lake built for use by a hydroelectric power station lies near the village, which is a favourite resort among skiers. A two-seater chair lift brings visitors to Alpe Campo, starting point of 2 skilift facilities. The slopes of Alpe Campo near Rimasco, including 3 Km of pistes with artificial snow- making equipment and serviced by skilifts, an ice-skating rink and several accommodation facilities make for a relaxing winter holiday in a welcoming and peaceful setting.

In **Carcoforo** cross-country skiing professionals find a track complying with FIS (Italian Federation of Winter Sports) standards for competitions at a national level. The track, groomed mechanically, is rather challenging and it is made up of 3 rings unwinding along the banks of a stream through the charming landscapes of the Egua Valley. The first ring, 5 Km in length, has mixed features, the second one, 2 Km in length, is the easiest, while the third ring, 3 Km in length has a medium-high difficulty level and allows for both classic style and free technique. Thanks to the features of the tracks even absolute beginners will soon take to cross-country skiing, while baby slopes and the local skiing school are especially convenient to those who wish to learn the art of downhill skiing easily and safely.

Lake Tourist District and Ossola Valleys

The Piedmontese Lakes Area includes the Ossola Valley, Lake Maggiore, Lake Orta and Lake Mergozzo, shimmering water of rare beauty, jewels set in magnificent and graceful surroundings. The wide territory of the Valleys in the Ossola area, just north of Lake Maggiore, borders with the Swiss Vallesse (Valais) and Ticino (Tessin) Cantons. The tall mountains encircling the Ossola district offer winter sports enthusiasts a perfect and exciting setting, provided with technical support of proven reliability and high professionalism also concerning safety requirements. Downhill skiing slopes and facilities are plentiful in the well-renowned resorts of the area: Macugnaga, Domobianca, San Domenico Ciamporino, the Vigizzo Valley, Alpe Devero and the Formazza Valley. Perfectly tended cross-country skiing tracks of all levels of difficulty unwinding through landscapes of extraordinary charm are available at the following locations: Formazza, Santa Maria Maggiore, Trasquera, Macugnaga, Antronapiana, Alpe Devero and Domobianca. Newer snow sports, such as snowboarding, freestyle and heli-skiing can be practised in this district and training courses given by local instructors are always available. Macugnaga, Antronapiana, Premia, Formazza and Malesco all have ice-skating rinks equipped with lighting installations. Ski mountaineering enthusiasts should not miss the outstanding local tracks. The wide ring of the Lepontine Alps includes several exciting itineraries of striking beauty, and of various levels of difficulty. The alpine guides operating in the Ossola area provide a service of high professionalism and reliability, while the local CAI (Italian Alpine Club) associations organize beginner and advanced courses for those who want to improve their ski mountaineering expertise.

Macugnaga is a typical alpine village that stands at the foot of Monte Rosa in the centre of a valley rich in conifer tree forests. Besides the fascinating landscapes and the highly organised tourist sector, Macugnaga also boasts top-level infrastructures and services. The high altitude of the area guarantees constant snowfall also in the village, which is therefore the perfect setting for a holiday on the slopes or for a relaxing and invigorating break. 40 km of downhill pistes, partially covered in artificial snow to ensure their availability throughout the whole season offer various levels of difficulty, thus satisfying the needs of each and every skier. 20 km of cross-country skiing tracks divided into two sections with different degrees of difficulty bring sports lovers in close contact with nature. A snow tubing park allowing visitors to experience the excitement of sliding down slopes on inflated rubber tyres, a mountain refuge with a stunning panoramic view on Monte Moro (3,000 m) that can be reached by cable car, a hockey ground and a skating rink that are both equipped with lighting installations are among the numerous winter sports facilities available in Macugnaga. Alpine Guides organize excursions to ice waterfalls and ski mountaineering

outings with the highest safety standards. The well-established local mountaineering tradition encourages many professionals to live and train here, such as Claudio Schranz, well-known all around the world and originally from Macugnaga. The Mountain Museum and the Guida Goldmine (Borca di Macugnaga), the only European mine open to visitors, food and wines typical of the Waldensian tradition, a fitness centre, cafes, restaurants, nightclubs and a congress centre enhance the selection of facilities and attractions in the area.

DIFFICULT SLOPES

It is extremely easy to reach the skiing resort of **Domobianca**. It is one and a half hours away from Milan and even closer to Como, Varese and Novara, thus ideal for a trip to the slopes even during the week. Furthermore, in Domobianca everybody has the chance to experience the joys of skiing because there are slopes of all levels interconnected with each other and perfectly covered in snow thanks to a state-of-the-art artificial snow-making system. There are green pistes for absolute beginners, while the blue "Foppiano" slope is slightly more exciting but still suitable for the rather inexperienced. At higher altitudes, several black pistes are surrounded by wonderful alpine landscapes and offer breathtaking views. There are also runs reserved for training pro-

grammes and pistes that comply with FIS (Italian Federation of Winter Sports) standards for regional and national competitions. The total difference in altitude is over 1000 m. Among the available recreational services: several cafés and self-service restaurants, which can be easily reached on skis, sunbathing terraces and a number of first aid stations to safeguard the health and safety of visitors. A shuttle bus service to and from the railway station in Domodossola, free parking areas only 50-100 m from the start of the skiing facilities, debit and credit card payment services and a paragliding take-off site make Domobianca an outstanding and highly efficient resort. All the necessary services and recreational facilities are only 15 minutes away from the slopes.

The small and graceful village of **San Domenico**, at the foot of the Sempione peak, is one of the most recent resorts in the Ossola area but it is undergoing continuous expansion and transformations. The lift facilities transport visitors from San Domenico to the vast basin of **Alpe Ciamporino** (2000 m), one of the locations with the best snowfall in the whole Ossola district. From here other lift facilities lead to the highest tip of Dosso (2500 m), an area provided with downhill pistes and snowboarding tracks. The resort is well-known not only for its skiing slopes but also for wide and completely safe off-piste skiing tracks. San Domenico does not cater solely for experienced skiers; a learning ground and the help of highly professional instructors from the local Skiing School allow beginners to acquire basics skills

at their own pace and with maximum enjoyment. A small path surrounded by forests descends into the valley and skiers do not need to take their skis off to reach the departure point of the chair lift and the centre of the village. In Trasquera, a few kilometres from San Domenico, Nordic skiing enthusiasts can visit the La Sotta Cross-Country Centre, which boasts a 6,5 Km ring unwinding through charming conifer tree forests and provides accommodation for visitors.

The **Formazza Valley** boasts high-quality winter sports facilities with a well-established tradition. The local Ski Club was set up at the beginning of the 1900s and is among the oldest in Italy. **Valdo** offers a wide selection of lifts – the Valdo 1, Valdo 2 and small Gadostaadt ski lifts and the Sagesboden chair lift – while San Michele and Riale are the locations of two Cross-country Skiing Centres of the same names with top-quality tracks unwinding through forests and surrounded by fairytale-like landscapes. A ski lift for nighttime skiing is available in Ponte. The Formazza Valley is an ideal setting also for ski mountaineering with several itineraries that allow for the exploration of the peaks bordering with Switzerland. The Sidel glacier (3,000 m) provides for summertime skiing and sportspeople can lodge at the welcoming 3A Refuge, which is also home to a summertime skiing School. The inhabitants of the Formazza Valley are descendants of ancient Waldensian populations, whose customs and traditions are still kept alive today. In fact, most of the population speaks the local dialect and there are several typical houses built with

dark wood as well as examples of the traditional mountain architecture. The age-old gastronomic tradition, based especially on well-known dairy products, is preserved in many delicious recipes.

The **Vigezzo Valley** is one of the main tourist locations in the Ossola area. **Santa Maria Maggiore** is home to a Cross-country skiing Centre, with over 20 Km of tracks of various difficulty levels stretching from Santa Maria Maggiore to Druogno and Malesco. These tracks cater for beginners who enjoy relaxing excursions through pine-forests as well as for the numerous young talents in this sport who live in the valley and want to train hard at a professional level. The nearby **Loana Valley**, at an altitude of 1300 m, boasts a track that is operational also when the snowfall is scarce and until late spring. The La Piana skiing resort, in the Borough of Craveggia, can be reached by means of a cableway departing from the Prestinone area. In **La Piana**, at an altitude of 1725 m, skiers and snow-boarders can access three chair lifts and a skilift and experience exciting descents along wonderful slopes. The skilift in **Cui Dariolo**, in the Borough of Malesco, allows beginners to learn the art of skiing in an unspoilt natural environment. Unforgettable landscapes in the bottoms of the valley and among the peaks are

ideal for ski mountaineering and for cross-country skiing excursions. Moreover at Baitina di Druogno there are a tapiroulant and a skilift together with a playground.

www.neveazzurra.it

The **Alpe Devero** basin, part of the **Veglia-Devero Natural Park**, is a small skiing resort that presents skiers with many recreational activities in a totally unspoilt environment. Three ski lifts and a chair lift bring visitors to the peak of **Monte Cazzola** where they can start their descent along downhill pistes of medium difficulty or explore a wide area dedicated to thoroughly safe off-piste excursions. There are three cross-country skiing rings of various lengths – 2, 3, or 5 km – suited also to beginners because the most challenging uphill slopes of the medium piste can easily be bypassed and the panoramic run leading to Crampiolo can be completed without skis. Moreover, ski mountaineering excursions of the highest quality are available for enthusiasts of this sport.

ALPINE AID

ALPINE GUIDES

The Biella region

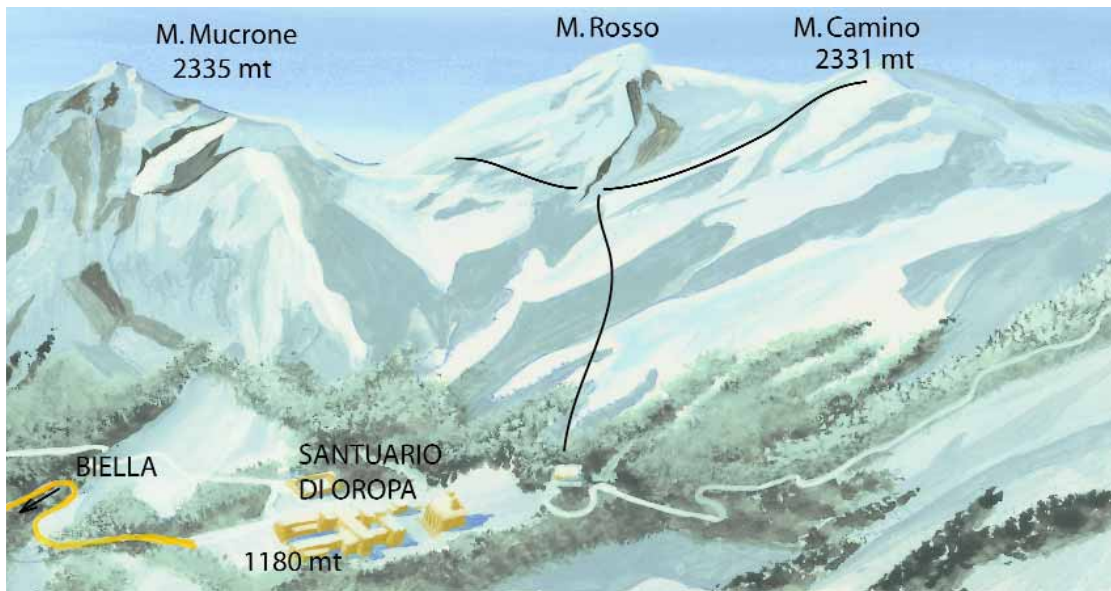

The territory of **Bielmonte** is located only a few kilometres away from Biella, the town of textile industries and of outlets of the big names in fashion. Biellmonte is well renowned for “kilometro lanciato”, a speed ski slope. The skiing facilities of **Oropa Mucrone** are located close to one of the most famous Marian sanctuaries of the Alpine chain. The newest conception of skiing week that combines sporting activities on the snow, cultural excursions and shopping reaches its peak here. The territory that surrounds Biella is framed by an arch of mountains that slope gradually down to hills rich in parks and gardens, where the artistic and religious wealth combines with unique examples of industrial archaeology. The traditional cookery of the valley, based on simple ingredients deriving from agriculture and widespread stock raising, is famous mostly for the “toma” cheese produced in the valleys around Biella and for the rice and soups cooked according to peasant recipes.

Oropa, home to the famous **Marian Sanctuary**, is located at 1180 meters above sea level. The large open area behind the **New Basilica** is where the cableway and ski lifts depart, allowing tourists to reach the slopes quickly and comfortably. For those who do not ski, Oropa offers cafés and patios where you can sunbathe, visits to the Sanctuary, its shops and the Sacro Monte (Holy Mount). The skiing facility is located in the basin of the Oropa stream, at the foot of Monte Mucrone and the presence of snow is certain between December and April. The tracks and slopes for cross-country and downhill skiing, with different levels of difficulty, begin at the cableway and on two mountains, **Monte Mucrone** and **Monte Camino**. In the vicinity of the numerous available parking areas tourists will find several restaurants where they can sample the typical specialties of the valley, as well as cafés, snack bars, shops and the rooms of the Sanctuary. Oropa also

offers visitors walks, trekking, mountaineering, alpine skiing and much more in the peaceful surroundings of the "Sanctuary under the sky". Moreover, due to its proximity to Biella, which is only 10 minutes away by car, Oropa is able to offer all the services and amusements of a city, including a wide choice of hotel accommodation.

Bielmonte is part of the territory of the “Zegna Oasis”, which stretches for 26 km along the Panoramic Road between Trivero and Rosazza, in the Cervo Valley. Skiing in Bielmonte means having access to easy and relaxing pistes, ideal for children, as well as black pistes, like that of **Scheggiola** and of **Dosso Grande** on the northern side. During the last season the slopes of the 1st square proved very successful thanks to their lighting installations for nighttime skiing. Lovers of snowboarding will enjoy a “snowboard park” with 8 different jump structures. There are theme slopes for children, such as “on the dragon’s back” and “on the chamois’s trail”, a “baby-park”, complete with a ski carpet, as well as 20 km of pistes for downhill skiing, with an enclosed area for professionals, and 20 km of cross-country tracks suitable for

all techniques; alpine skiing excursions in the area of **Alta Valsessera** are also available. This is the manifold offer of Bielmonte dedicated to lovers of winter sports. To complement it, there are also wide parking areas, 2 hotels, restaurants, snack bars and cafes, holiday farmhouses, shops and a breathtaking panoramic view over the Po Valley.

The Valleys of the Lanzo and Canavese areas are just a few kilometres away from Turin. The Lanzo Valleys (**Val di Viù, Val d'Ala and Val Grande**) are divided by the branches of the Stura river and their environment has fully preserved the natural beauty, with lush forests, crystal-clear streams and lakes, rocky buttresses, snow capped peaks and wonderful specimens of animals and flowers. The most well-known valleys of the Canavese area are **Valle Orco** and **Valchiusella**. All year round, visitors who wander in the mountains sur-

rounding the valleys of the Lanzo and Canavese areas can discover lakes, dells, unspoilt nature reserves and parks steeped in perfumes and colours, enshrouded by the sound of silence. They will be welcomed by the sincere and warm hospitality of the inhabitants, enthralled by the outstanding local cuisine based on natural products, wholesome cheeses, homemade jams with the flavours of old, all served in very cosy environments.

Val Grande is the home to several natural attractions, wonderful mountains, charming alpine lakes and magnificent glaciers. Winter sports enthusiasts will enjoy its peaceful and relaxing environment. Sports activities take place mainly in **Groscavallo** and **Chialamberto**, where the pistes unwind on tracks of 8 and 17 km in length, connected to each other for about 30 km of skiing facilities in total. **The Forno Alpi Graie** area offers a few free cross-country ring tracks with an overall length of 2 km, where you can enjoy cross-country tracks and snowshoe excursions. **It is advisable to phone the numbers listed under Info because the tracks are not always fully accessible.** Moreover, Val Grande has a wealth of art and history; visitors will be enchanted by Romanesque bell-towers, sanctuaries and churches

where precious and ancient artistic relics are preserved, while the celebrations for the Patron Saint bring ancient customs back to life, passing them down to the younger generation as collective historical memories.

Ala di Stura and **Balme** make up a modern and well-equipped skiing district. The cross-country track in the Borough of Balme leads from the village to the **Pian della Mussa** plain, at 1,850 m, encircled by high rocky pinnacles. The track stretches for 35 kilometres in a landscape dominated by the towering Uja di Ciamarella and the Bessanese peaks. Ala di Stura's cross-country skiing track unwinds through the plain where the small village of Villar is located; it is 7.5 km long and allows for both classic stride and skating techniques. **It is advisable to phone the number listed under Info because the track is not always fully accessible.** The Ala Valley has preserved its distinctive folklore that is revived every year during local celebrations characterized by traditional dances and, above all, by traditional female costumes, which have remained unchanged for centuries. Furthermore, the valley is rich in artistic and natural wealth, besides being

famous for the numerous sundials painted on the walls of the houses. The Ala Valley is also a perfect choice for lovers of good food who will enjoy several wholesome products such as "tuma", a cheese made using a special press, "polenta" (cooked cornmeal), small fresh or seasoned goat cheeses, beef, goat, mutton and game. Those with a sweet tooth will not be able to resist the "paste di meliga" biscuits and jams prepared with local bilberries, while the bilberry grappa brandy and "genepy", an infusion of flowers of different species of Artemisia, are not to be missed at the end of meals.

The **Valley of Viù** is a popular spot for many skiers during the winter season. Besides the lift facilities of the **Col del Lys** and **Pian Benot**, there is also a cross-country track located in the **Plain of Usseglio**, a picturesque valley overlooked by the mountain clusters of Torre d'Ovada, Lera and Rocciamelone. The track unwinds for 11 km through wonderful natural scenery. It is composed of 5 rings, ideal for beginners and for skilled skiers alike, and it is suitable both for classic techniques and for skating. The traditional language spoken in the area of Viù is the Franco-Provençal Patois. Nowadays, however, the local inhabitants also speak the Piedmontese dialect and their patois dialect is slowly losing its original traits. Nevertheless, during the celebrations for the Patron Saint, the so-called "Priore" of each chapel still wear the traditional festive costume, known as "Ciosina". The local

products include cheese, "torcetti" and "paste di meliga", two typical kinds of biscuits.

The **Orco Valley** partially comprises one of the most important protected areas of Italy, the “**Gran Paradiso**” **National Park**, unique for its natural riches and the first to be created in Italy. On the borders of the park, in the Boroughs of **Ceresole Reale**, **Locana**, **Alpette** and **Valprato Soana**, snow enthusiasts will enjoy many sports opportunities during the winter season: cross-country skiing, climbing and ice skating. The Orco Valley, already well-known in the 19th century for its natural beauty, experienced great fame around the year 1850. The local administration of Ceresole gave King Victor Emanuel II the right to hunt chamois and alpine ibex in exchange for the honorific title “Reale” (Royal). The King himself, Queen Margherita and the poet Giosuè Carducci often sojourned in the valley, which became even more famous after the construction of an artificial water basin, opened in 1932 by the then heir to the throne of Italy Umberto of Savoy.

How to get there

By car: freeway from Turin to Caselle airport, take exit 2 leading to ex State Road 460 and follow signs for Cuorgnè-Pont Canavese-Locana-Ceresole Reale. For Alpette and Valprato Soana turn off respectively in Cuorgnè and Pont Canavese.

Valchiusella is a narrow valley located just a few kilometres from Ivrea. Nature and mankind coexist here in perfect harmony and the environment is shaped by the work of men but never spoilt. Several mountain sports are available here: there are tracks for skiing excursions and for cross-country skiing and the facilities of **Palit**, in the small village of **Vaudanza di Traversella**, offer both exciting slopes and relaxing moments in a sunny and panoramic spot with a view over the higher lands of Canavese. Throughout the centuries, Valchiusella has been the setting of many historical events of the Canavese area. The Celts and the Salassi tribes were the first to extract and process the valuable local ores, the main economical resource of the valley. Along the numerous and charming paths that run through fields, summer pastures, forests and ancient villages you will find the most important stone carvings of the district.

Caldirola is located along the slopes of Monte **Gropà**, in the high **Curone Valley**, in the borough of Fabbria Curone. The district boasts one of the oldest skiing tradition and histories in Italy. The skiing facilities in Caldirola have, in fact, been operational since 1929, when the local pistes and inns could only be reached by donkey. The pistes are provided with two ski lifts and with a chair lift that starts at **La Gioia** (1,110 m) and ascends to the top of Monte **Gropà** (1,446 m) from where, on clear winter days, visitors can behold the Ligurian Sea in the south and the Po Valley, the city of Milan and the whole chain of the Alps in the north. There are 4 pistes for alpine skiing, of different degrees of difficulty which all converge into the same gully where the chair lift starts. A cross-country skiing ring track at the foot of Monte Gropà enhances the

local appeal to skiers. Moreover, after-skiing activities are plentiful, with many cafés and a disco, as well as restaurants and hotels located in the several little villages that make up the Borough of Fabbria Curone.

A region of substance and not of simple appearance, Piedmont is "geographically speaking" a pallet of different entities, united by common underlying characteristics and by a strong predisposition to experimentation.

It is undeniable that the mountains have a very special place in Piedmont's heart. The region is, in fact, surrounded by a "white ring", made up of one thousand three hundred kilometres of skiing pistes distributed all along the alpine chain.

This "treasure" led the region to being chosen as the location for the 2006 Winter Olympic Games. Piedmont also boasts 190 hectares of natural parks and the main city of the region, Turin, has the highest percentage of green areas per inhabitant of all the other Italian cities.

Piedmont: a great “factory” of challenges

These outstanding features are complemented by a system of high economic and industrial skill that has enabled of Piedmont to reach a top position among the regions of Europe.

In the very near future, Piedmont's challenge is to accomplish a perfect mix of all its potentials to turn the Games into an unforgettable event in which nature, culture, technology, economic reliability, organisational skills and the attention of the media become one in a unique "prime-time" show.

This is no intimidating challenge, since Piedmont has always been able to thoroughly blend its great tradition with its keenness on innovation.
